

TWIN PONDS FARM

Bird Nesting Balls **Handmade, filled with 100% alpaca fiber**

Just in time for the spring migration and nesting season, now's the time to put our Bird Nesting Balls out.

- The Bird Nesting Balls are made of jute, approximately 5" in diameter and generously filled with our own alpaca fiber inside. The Bird Nesting Balls hang from a piece of jute and can be hung on a branch.
- Each Bird Nesting Ball is custom made and may look slightly different than what is pictured. The colors of the fiber are all natural. We mix fiber, which may come in different colors, from our own herd of Huacaya and Suri Alpacas.
- Alpaca Bird Nesting Balls can be refilled and used year after year. Refilling them is just a matter of pushing fiber through the holes of the jute ball with a pencil, knitting needle, screwdriver, your finger.
- When nesting birds line their nests, not only will the eggs and chicks have a soft bed, but the alpaca fleece will also help to regulate their body temperature, keeping the eggs and babies safe from shifting temperatures.
- If you put feeders out for the birds, you may want to hang a nesting ball nearby
